July 4, 2017

Summary of Eilon's Work on Prevention of Distressing and Harmful Resident-to-Resident Interactions in Dementia in Long-Term Care Homes

Training Programs

Caspi E. (2017). Eight 3-hour staff training sessions on prevention of distressing and harmful resident-to-resident interactions in dementia in long-term care homes. Delivered on March 13-15 in **Thunder Bay** and March 29-30, 2017 in **Kenora** and **Fort Frances**. Invited by Alison Denton, manager, Regional Behavioral Health Services for Northwestern Ontario with St. Joseph's Care Group, Thunder Bay, Ontario, Canada.

Caspi, E. (2016). Fighting for dignity: Prevention of distressing and harmful resident-to-resident interactions in dementia in long-term care homes. Presentation delivered on 9.13.16 for **LeadingAge Kansas's Joint Provider/Surveyor Training**. Wichita, KS.

Caspi, E. (2016). Fighting for dignity: Prevention of distressing and harmful resident-to-resident interactions in dementia in long-term care homes. Presentation delivered on 9.14.16 for **LeadingAge Kansas's Joint Provider/Surveyor Training**. Topeka, KS.

Caspi, E. (2016). Fighting for dignity: Prevention of distressing and harmful resident-to-resident interactions in dementia in long-term care homes. Presentation delivered on 10.12.16 as In-Service Annual Training for 165 Surveyors and Supervisors of the **Minnesota Department of Health** (such as Health Regulation Division, Licensing and Certification, Office of Health Complaints, Home Care & Assisted Living Program). The Long-Term Care Ombudsman staff are also invited to attend this presentation. The presentation is **sponsored by Orfield Labs Inc.** (Steve Orfield), Minneapolis, MN.

Caspi, E. (2011). Aggressive behaviors between residents with memory loss in an assisted living residence. Training delivered on 12.1.11 at Compass on the Bay Memory-Support Assisted Living, Boston. MA.

Caspi, E. (2010). Aggressive behaviors between elder residents with memory-loss in an assisted living residence. Training delivered on 12.12.10 to the interdisciplinary team of the psychogeriatric day center, Ichilov Hospital, Tel Aviv, Israel.

2000 – Trainer. Home for the Aged in Tel Aviv, Israel. Delivered a 5-session workshop on prevention of conflicts between elder residents with low-income.

Expert Consulting Services

March 2017 – Present. Consulting Alzheimer’s Society of Canada on development of educational resources on prevention of distressing and harmful resident-to-resident interactions in dementia in long-term care homes. For Mary Schultz, Director of Education, Alzheimer’s Society of Canada, Toronto, Ontario, Canada.

Invited for 1-day meeting with researchers, practitioners, and care advocates to develop a research agenda on resident-to-resident aggression in long-term care homes in Canada. This first-of-its-kind event was funded by the Canadian Institutes for Health Research and hosted by the Institute for Life Course & Aging, University of Toronto. The initiative was led by Prof. Lynn McDonald and was held on 5.20.14 in Toronto.

Archival Blog. The International Center for Prevention of Distressful and Harmful Resident-to-Resident Interactions in Dementia in Long-Term Care Homes

Launched in April 2012. The blog aims to raise awareness to and provide resources for prevention of the public health problem of distressing and harmful resident-to-resident interactions in dementia in long-term care homes. Visitors are invited to ask questions and/or share resources. To access the over 1,750 free resources posted on the blog, go to: <http://eiloncaspiabbr.tumblr.com>

Documentary Film

I am collaborating with my colleagues Judy Berry, president, Dementia Specialist Consulting and Julius Keya, director, Brilliant Image Productions, on the first documentary film on injurious and fatal resident-to-resident incidents in dementia in long-term care homes. We recently traveled to South Carolina to interview (video recorded) the wife of an elder resident with Alzheimer's disease who died a week after he was attacked by another resident with dementia after he entered his bedroom and lied in his bed. We plan on interviewing other family members of residents who were injured or died due to these incidents for a full-length documentary film.

Assistive Technology

I am collaborating with Steve Orfield (Orfield Labs, Inc) in Minneapolis on development of an assistive technology that aims to generate a signal in real time when a resident is engaged in a physical altercation with another resident. Half of U.S. nursing homes are understaffed and at least a quarter are dangerously understaffed (as was recently shown in a review of dozens of research studies conducted by Harrington et al. 2016). Many assisted living residences (the fastest growing residential care option for elders in the U.S. with rapid growth in the number of care homes dedicated specifically for people with dementia) are also understaffed and I don't see staffing levels improving in Minnesota and across the country any time soon. Assisting understaffed and overworked care staff members in identifying these incidents before they escalate and cause injury and death to target residents using an assistive technology is urgently needed. If we are successful in developing an effective assistive technology, it could help prevent injuries and deaths of vulnerable and frail elders with dementia. If we are successful in developing an effective assistive technology, it could help prevent injuries and deaths of vulnerable and frail elders with dementia.
