Letter of Recommendation for Eilon Caspi

I have known Dr. Eilon Caspi for four years through my role as the Director of Aging Services for Jewish Family and Children's Service of Minneapolis, the co-chair of the Twin Cities Jewish Community Alzheimer's Task Force, the St. Louis Park Alzheimer's ACTION team, and the state of Minnesota leadership group for Dementia Friendly Communities through ACT on Alzheimer's. It is my privilege to recommend him as a dementia caregiver coach.

Dr. Caspi has an understanding of people with dementia and their behavioral expressions better than any professional I have met in the field. His guidance could be a lifesaver for caregivers in understanding how to relate to their loved ones and how to take care of themselves as caregivers.

Dr. Caspi has published articles and continues to do research that adds to the base of knowledge in the field of dementia. His techniques to understand behavioral expressions could revolutionize the care provided within institutional setting. The training he can provide will improve quality of care for all of our loved ones.

Dr. Caspi has been generous with his time as a volunteer member of the Twin Cities Jewish Community Alzheimer's Task Force. He has provided his expertise in presentation and training within the community and his knowledge grounds the project that we undertake with research.

I anticipate him to be a precious asset to all those who aspire to provide the highest possible quality of care for people living with dementia.

Sincerely,

Annette Sandler
